Just started tinkering with the table editor which has some interesting features to build small and large battlefields.. It brings me back to Heroscape except now it's on my PC and it's beautifully done :)The devs are super responsive, many replies to suggestions and feedback.. I've been a huge fan of Heroscape for years, many memories I've been looking for a game that was able to capture that type of gameplay but on a platform where making maps, battling others and overall mechanics were close to that.

Awsome feeling in game, nice little campaign, good dev response Game is gfx super.. Longsword - Tabletop Tactics Download ApkpureDownload >>> <http://bit.ly/2NMwccpMirror> >>> <http://bit.ly/2NMwccpMirror>

Longsword does it Longsword does it well The way you can create your armies and have actual strategy as you try to defeat your oppoent.. Actually cares about the future of the game I look forward to its greatest version and I'll be there every step of the way.. (Minor) Bugs are still there, but I hope they will be ironed out soon so the game can live up to its potential.. Though with more cards coming out and more map editor tools on the way, it's going to get INSANE and I can't wait!! [Die hinduistische Eheschließung von 1955 pdf](#)

Apparently a GM feature is possible a bit later Cant wait to see how it goes further in development.. The demo gives you a pretty good impression of the game So if you are interested, just try it out, nothing to loose.. Has a feeling of board miniature games without boring details that are done automatically..
